(54) ADJUVANT COMPOSED OF HVJ-CHARGED LIPOSOME

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an adjuvant composed of an HVJ-charged liposome capable of inducing humoral immunity and cellular immunity and inducing high immunoenhancing activity even on a peptide having low immunogenicity.

SOLUTION: The present invention relates to an HVJ-charged liposome composed of a lipid having electric charge and Sendai virus (HVJ) as main constituent components, an immune composition produced by sealing an epitope peptide of human immunodeficiency virus in the HVJ-charged liposome and a method for the preparation of the liposome and the composition.
